Supports digestive system health and general wellbeing.

May help to relieve spasm of the gastrointestinal tract, nausea, heartburn and respiratory catarrh.

Herbs used in traditional medicine systems to relieve chills and mild fevers.

Natural Herbal Medicine supplement for home and travel

Artemisia Plus brings together ancient remedies from Eastern and Western Medicine to deliver century's old wisdom for natural healthcare.

- Supports healthy digestion and may help to relieve mild digestive upset
- Herbs traditionally used in herbal medicine systems to relieve chills and minor fevers and support a healthy immune system
- May help relieve flatulence, bloating and nausea
- May help to relieve spasm of the gastrointestinal tract, heartburn and respiratory catarrh

Artemisia Plus is a natural medicine supplement which combines the powers of three traditional herbs to assist in the improvement and maintenance of general wellbeing.

Artemisia Plus is a versatile herbal medicine which can be used alone and/or as part of a treatment plan.

A powerful combination.

Artemisia Plus is an original herbal formulation combining extracts of *Artemisia annua* herb, Pau d'arco inner stem bark and Fennel seed to help improve and maintain general wellbeing. It is a pleasantly fragrant herbal medicine with no bitter after taste.

Artemisia annua (Chinese wormwood)

Artemisia annua (Chinese wormwood) is a renowned bitter herb used for more than 2000 years in Traditional Chinese Medicine for the relief of chills and minor fevers. It is known under many different names including: Qinghao, Chinese Wormwood, Sweet Annie, Sweet Sagewort, Sweet Wormwood and Annual Wormwood. Traditionally, *Artemisia annua* was drunk as a tea using either the seeds or leaves depending on the ailment, herbal tinctures have been used since.

Handroanthus impetiginosus (Pau d'arco)

Pau d'arco has been traditionally used for many years in South America for various health reasons. *Handroanthus* species (formerly known as *Tabebuia* species) has a history of therapeutic use in South America for the relief of minor fevers and to support healthy immune function. Pau d'arco is used globally to help maintain and improve general wellbeing.

Foeniculum vulgare (Fennel seed)

Fennel seed extract has been used extensively all over the world as a carminative, that is, to relieve symptoms of flatulence and bloating. Fennel may also help to relieve heartburn and nausea. Fennel helps support a healthy digestive system and may help relieve respiratory catarrh. Fennel is traditionally used in herbal medicine to help relieve pain associated with menstruation and as an expectorant to relieve coughs associated with colds. Fennel seed is very aromatic with a pleasant taste.

Artemisia annua leaves.

Handroanthus impetiginosus bark

Foeniculum vulgare seeds.

A convenient, easy to swallow and versatile herbal medicine for home and when travelling.

The perfect travel companion

Artemisia Plus can be taken before, during and after travel. It is a versatile herbal medicine supplement containing herbs that have traditionally been used in herbal medicine systems for the relief of chills and mild fevers and to support the health and function of the immune system.

Artemisia Plus may help relieve mild digestive upset, nausea, flatulence, heartburn, bloating and respiratory catarrh.

Artemisia Plus can be taken while traveling to help support and maintain general wellbeing.

Pleasant aroma and taste

Traditionally used as a tea or tincture, *Artemisia annua* generally has a very unpleasant taste. Artemisia Plus Herbal Medicine Complex is an aromatic natural medicine supplement. Artemisia Plus has a pleasant aroma and taste and is specifically designed to be easily swallowed with no bitter after taste. When giving to children, each tablet has a break bar to assist in delivering smaller doses.

Artemisia Plus is an original formula which combines the powers of three traditional herbs to support digestive health, support immune function and assist in the improvement of general wellbeing.

Artemisia annua and Artemisinin

The herb *Artemisia annua* has a long history of use both in Asia and Europe.

Artemisia Plus is made using the herb *Artemisia annua* which has been used in TCM (Traditional Chinese Medicine) for thousands of years. According to the Pharmacopoeia of the People's Republic of China, *Artemisia annua* or Qinghao is indicated for "fever caused by summer-heat; afternoon fever in deficiency of yin." Reference to the medicinal use of *Artemisia annua* (Qinghao) has been found in the earliest recorded Chinese medicinal text the Wu Shi Er Bing Fang (Prescriptions for Fifty-two Diseases) which was compiled between 1065 and 771BC.

The modern TCM use of *Artemisia annua* is to dispel heat, cool the blood, remove fever and prevent qi from being 'consumed' by summer heat syndrome.

The modern pharmaceutical use of *Artemisia annua* uses only an isolated principle of the plant - Artemisinin. Artemisia Plus contains Artemisinin, but because it is a "whole plant extract" it also contains all the other active principles of the plant, making it a holistic herbal therapy.

Artemisia Plus AUST L 220235
